

Savannah CRTC Training Enabled Maneuver Instrumentation - STEM

Proposed Recipient: Georgia Air National Guard - Savannah Combat Readiness Training Center

Address of Recipient: PO Box 7299, Garden City, GA 31418-7299

Amount of Request: \$4.5 Million

Explanation of Request

Purpose: Provides enhanced network and tactical data links for training units prior to activating for combat operations. Ground-based air controllers employ joint, interoperable tactical data links coupled with ACMI data (time, position, navigation) and integrated with advanced air and ground threat emitters with Joint Test and Evaluation Network (JTEN) Test Enabled Network Architecture (TENA). The Air National Guard requires the integration between the Pocket J, ACMI, and advanced threat emitters to provide this critical capability.

Why is it a good use of Taxpayer funds: Expands the range for training virtually without environmental impact. Also allows for greater participation from other military services.
